

CIRKUS

KML AVIATION OY

One place for OH-KML: book it, log the flight, see what you owe.

Cirkus is the co-owners' own web app for our Cirrus SR20. It works in the browser on your phone and on your laptop — nothing to install.

Book

A week calendar shows when the aircraft is free. Tap a slot, confirm, done. Two people can't book the same time — the system won't allow it.

Log the flight

After landing, enter the tachometer readings, times, route, landings and flight type. The tachometer start is filled in for you from the previous flight.

Your logbook

Every flight you've flown, with your total hours, PIC hours and this month's flying — always at hand, always in UTC.

Invoices

Your flying is invoiced by the hour from the tachometer. See what's open, what's paid, and print any invoice for your own records.

A flight, from start to finish

01

Book

Pick a free slot in the calendar for the day you want to fly. Change or cancel it yourself if plans change.

02

Fly

Nothing to do in the app while you're flying. Note the tachometer at start and end as usual.

03

Log

Enter the flight — a couple of minutes on the phone. It appears in your logbook straight away.

04

Invoice

An admin checks the flight and, when it's time, creates the invoice. Yours shows up under Invoices.

Good to know

- **Reservations are in Finnish time**, the logbook is in UTC — the way the paper logbook has always been.
- **Each flight has a type** (harjoituslento, matkalento, koululento...) chosen from the club's list, so the bookkeeping lands in the right place.
- **Persons on board** is recorded on every flight.
- **You can only cancel your own bookings** and only delete your own flight until an admin has approved it.
- **An invoice lists each flight** with the tachometer readings and the hourly rate, so it's easy to check.
- **Forgot your password?** Ask Kari or Antti — they can set you a new one. You can change it yourself afterwards.

For the admins

- **Approvals** — new members who register themselves wait here until approved.
- **Flights** — logged flights are approved here before they can be invoiced.
- **Billing** — one click creates an invoice per pilot for everything approved and not yet billed; mark them paid as the money arrives.
- **Fleet** — the aircraft, its seats, hourly rates and co-owners.
- **Flight types** and **Accounts** — the club's lists, editable any time.

Getting started

- WHERE** Open the address you've been sent, in any browser. On the phone, add it to your home screen and it behaves like an app.
- LOG IN** With your email address and the password you've been given. Change it under *More* → *Change password*.
- HELP** Kari Häkkinen or Antti Hänninen.

Nothing to install, nothing to update. Your data is stored securely in the cloud and backed up daily.
